Who can attend :

- **Professionals in Public Health:** Individuals working in public Health policy, Epidemiology, Global Health, or Health promotion may be invited to attend to learn about recent developments and strategies.
- **Nurses and Nursing Professionals:** Nurses working in various healthcare settings, including Hospitals, Clinics, and Community Health centers, can gain valuable insights into improving patient care, advanced nursing practices, and healthcare policies.
- **Healthcare Students:** Students currently studying public health, nursing, or related fields who wish to expand their knowledge and network with professionals in the field.
- **Academics and Researchers:** Individuals in Academia or Research positions who focus on Public Health and Nursing studies may attend to present Research, learn about new studies, and contribute to discussions.
- **Public Health Administrators and Policy Makers:** Those working in Public Health management, Healthcare policy, or Governmental health roles may attend to learn about new trends, challenges, and strategies in Health systems and Nursing.
- **Healthcare Workers and Support Staff:** Professionals who support healthcare teams, such as healthcare assistants, medical technicians, and public health advocates, might also be encouraged to participate.
- **Global Health Organizations:** Representatives from global health organizations, NGOs, and community health agencies that work on public health issues could benefit from the insights shared in the conference.
- **Public Health and Nursing Enthusiasts:** Any individuals with a passion for improving public health, healthcare delivery, and nursing practices may be invited, particularly if they seek to contribute to ongoing conversations or gain educational content.
- **Special Guest Speakers or Panelists:** Distinguished figures in the public health and nursing sectors, including experienced healthcare professionals, experts, or leaders, may be part of the conference as speakers or panelists.

Why Helix Conferences :

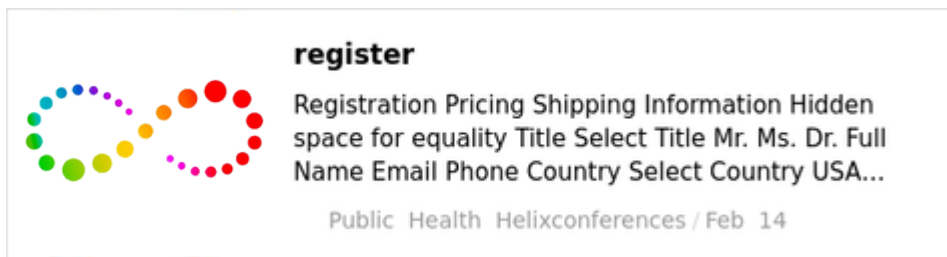

- **Platform to Share Expertise:** Speakers have the opportunity to share their research, best practices, and insights with a large, engaged audience of professionals, students, and decision-makers in the fields of public health and nursing. This is an excellent platform to disseminate knowledge and influence the future of healthcare.
- **Networking Opportunities:** Attending the conference allows speakers to network with other influential experts, policymakers, researchers, and practitioners. Building collaborations and partnerships with like-minded individuals or organizations can open new doors for research projects, clinical collaborations, or professional growth.
- **Enhance Professional Recognition:** Speaking at a prominent event like the Helix Conference can bolster a speaker's credibility and visibility within the public health and nursing sectors. It demonstrates leadership and expertise, contributing to career advancement and recognition among peers.
- **Exchange Ideas and Learn:** Speakers don't just present—they also have the opportunity to listen to other thought leaders, engage in discussions, and exchange innovative ideas. This can inspire new approaches and insights that speakers can apply to their own work and practices.
- **Personal and Professional Growth:** Participating as a speaker allows for personal development in public speaking, presentation skills, and engaging with a diverse audience. It's an opportunity to hone one's ability to communicate complex concepts in a clear and impactful manner.
- **Impact Future Generations:** Speakers can influence the next generation of healthcare professionals, whether through sharing cutting-edge research or providing mentorship. Presenting at such a conference allows speakers to have a lasting impact on students and early-career professionals who look to them as role models.
- **Highlight Innovation and Research:** For researchers and practitioners, the Helix Conference provides a perfect venue to showcase innovative findings, clinical trials, or groundbreaking research that could influence public health policies or nursing practices on a global scale.
- **Promote Professional Organizations or Institutions:** Speakers can use the opportunity to showcase the work of their affiliated organizations, research institutions, or academic programs. This helps increase visibility and build reputation for their institutions, potentially attracting new collaborations, students, or partners
